FOAM TAPE (AIF)
Hot & Cold Pipe Insulator

ACE FOAM INSULATION TAPE (AIF) is manufactured from a high quality closed-cell elastomeric thermal insulation material. **ACE FOAM INSULATION TAPE (AIF)** is suitable for use as an insulating material to prevent sweating and condensation on refrigerant lines, cold water pipes, and chill water lines. **ACE FOAM INSULATION TAPE (AIF)** will also minimize heat loss from hot water pipes.

FEATURES & BENEFITS

- Keeps hot pipes hot...and cold pipes cold.
- Eliminates pipe sweat and condensation of refrigeration or other chilled pipelines.
- Ideal for hot/cold pipes, refrigerant lines, chill water pipes etc.

DIRECTIONS for USE: Surfaces should be clean and dry. Wrap **ACE FOAM INSULATION TAPE (AIF)** in around the piping in a spiral, butting edges so that no piping is showing. Do not stretch the tape. Cut the tape into smaller segments to cover valves and fittings. If additional wrappings are necessary, reverse the direction of the wrap with each layer of tape.

The amount of tape required will depend upon relative humidity, ambient air temperature and pipe temperature.

SAFETY: Wash hands after use. **KEEP OUT OF THE REACH OF CHILDREN.**

PHYSICAL PROPERTIES

APPEARANCE	Foam Tape
COLOR	Black
ODOR	N/A
PACKAGING	12x1/8"x2"x30'/case
