

POWERFLUSH KIT (APFK)
Flush System for
HVAC/R Lines & Components

ACE POWERFLUSH KIT (APFK) is a unique, easy-to-use, re-usable flushing system designed for use to clean-out compressors after burnouts and to save existing line sets when converting systems to R-410A refrigerant.

FEATURES & BENEFITS

- Use for new system cleaning, compressor burnouts or refrigerant conversions
- OEM Approved Dupont solvent recognized under the U.S. EPA’s Significant New Alternatives Program (SNAP)
- Easy-to use refillable tank and injector tool makes flushing the quickest and easiest of any system on the market.
- Boiling point of 106°F insures optimum solvent performance.
- Solvent is non-ozone depleting and non-flammable
- System allows accurate dosing of Solvent ... overuse or wastage minimized.
- Compatible with hydrochloric/hydrofluoric acids normally associated with compressor burnouts ... enhances cleaning performance. Excellent degreaser.
- Cleaning is fast, efficient and verifiable

DIRECTIONS for USE: See the Powerflush Instruction Leaflet for complete application details

SAFETY: Avoid skin contact. Wash hands after use. If swallowed, do NOT induce vomiting. Drink large quantities of water and seek IMMEDIATE medical attention. Read MSDS for complete safety information before using. **KEEP OUT OF THE REACH OF CHILDREN.**

CAUTION: Contains Isopropyl Alcohol and 2-butoxyethanol. Wear gloves and goggles when using. Use in well-ventilated areas. Do not breathe vapors.

PHYSICAL PROPERTIES

ODOR	Solvent
COLOR	Clear Colorless Liquid
pH	N/A
SPECIFIC GRAVITY	N/A
PACKAGING	Kit - Injection Tank/Hose/Nozzle and 1x16 fl oz can
		Refills – 6 x 16 fl oz cans
